Jingxuan Li

jingxuanli2030@u.northwestern.edu | +1 424-440-0024 | Evanston, IL
candy26i.github.io | GitHub: Candy26i

Education

Northwestern University — Evanston, IL
PhD in Statistics and Data Science (second year) — Sep. 2025 - present

GPA: 3.89/4.0

Coursework: Large Language Models, Machine Learning, Statistical Theory, Advanced Regression.

University of California, Los Angeles — Los Angeles, CA
B.S. in Mathematics of Computation — Sep. 2021 - Jun. 2025

GPA: 3.98/4.0

Coursework: Optimization, Numerical Methods, Real Analysis.

Honors: Oda Abe Scholarship; Dean's Honors List (2021-2024).

Publications

MARGENT: Measuring the Marginal Value of Delegation in Agentic Systems

Yuning Yang*, **Jingxuan Li***, Yizhou Zhao, Linfan Zhang, Longhao Jin, Manling Li, Han Liu, Ying Nian Wu

Accepted at the NeurIPS 2026 Workshop on Resource-Aware Agentic AI (RAAAI)
(also submitted to ACL ARR)

Value-Spectrum: Quantifying Preferences of Vision-Language Models via Value Decomposition in Social Media Contexts

Jingxuan Li*, Yuning Yang*, Shengqi Yang, Linfan Zhang, Ying Nian Wu

ACL 2025, Main Conference

Research Experience

MARGENT: Delegation in LLM Multi-Agent Systems — Evanston, IL
Advisor: Prof. Ying Nian Wu (UCLA) — May 2025 - present

- Built a manager-specialist system in which a manager decides whether to call an extractor, reasoner, or verifier, or keep its current answer.
- Constructed paired reasoning branches to compare keeping a draft with calling each specialist, identifying when delegation improves or degrades the answer.
- Used branch comparisons to train manager decisions and evaluated delegation on MedQA, MMLU-Pro, GPQA, and AQuA-RAT.

Value-Spectrum: VLM Preferences and Personas — Los Angeles, CA
Advisor: Prof. Ying Nian Wu (UCLA) — Sep. 2023 - May 2025

- Built a pipeline for collecting screenshots and metadata from short-form social media content and recording VLM responses, with vectorized storage for image retrieval.
- Compared VLM preferences along Schwartz's ten human value dimensions using sentiment decomposition.
- Developed the Inductive Scoring Questionnaire (ISQ) prompting strategy and evaluated how consistently VLMs followed assigned personas.

Internship Experience

Tencent | Cloud & Smart Industries Group Beijing, China
Big Data Research Intern Aug. - Sep. 2024

- Applied NLP tools (jieba and ckip-transformers) to match WiFi SSIDs with point-of-interest names for store-level localization.
- Fine-tuned HunYuan-7B on a purpose-built matching dataset and compared its performance with a rule-based baseline.
- Contributed the matching algorithm to a production geolocation pipeline in Tencent Maps.

Tencent | Cloud & Smart Industries Group Beijing, China
Technical Research Intern Jul. - Sep. 2023

- Designed mathematical consistency checks to detect contradictions in apartment geospatial records.
- Reduced the time and space complexity of the detection algorithm in Python, improving runtime on the full record set.

Skills

Languages: Python, C++, JavaScript, MATLAB, SQL, R, LaTeX

ML & LLM: PyTorch, Hugging Face Transformers, PEFT/LoRA, TRL (GRPO), DeepSpeed, vLLM, TensorFlow, Keras, Scikit-learn

Data & Infrastructure: NumPy, Pandas, Matplotlib, PostgreSQL, Milvus, Prisma, AWS, Linux, Git, Tableau
