Jingxuan Li

+1 4244400024 jingxuanli2030@u.northwestern.edu 1590 Elmwood Ave, Evanston, IL Candy26i

Education

BS **University of California, Los Angeles**, Math of Computation — CA, USA
Sep. 2021 to Jun. 2025

- GPA: **3.98**/4.0
- Coursework: Machine Learning, Optimization, Numerical Methods, ODEs, Real Analysis, Complex Analysis, Advance Programming in C++, Statistics, Numerical methods, Probability theory, Math modeling, Computer Graphics.
- Honors: UCLA the Oda Abe **Scholarship** (Jun.2024), Dean's Honors List (2021, 2022, 2023, 2024)

Publications

Quantifying Preferences of Vision-Language Models via Value Decomposition in Social Media Contexts
Jingxuan Li, Yuning Yang, Shengqi Yang, Linfan Zhang, Ying Nian Wu
ACL 2025 Main

Research Experience

UCLA, Researcher on VLM's latent and induced persona, — CA, USA
Advisor: Prof. Ying Nian Wu — Sep. 2023 to now

- Curated a **vectorized image dataset** from social media shorts using an automated **GUI-based pipeline**, capturing and processing screenshots for benchmarking.
- Benchmarked and analyzed the sentiment preferences of VLMs based on Schwartz's 10 Value Dimensions, evaluating models such as **Claude 3.5**, **Gemini 1.5**, **GPT-4o**, **Blip 2**, and **CogVLM**.
- Designed a pipeline in **inducing VLM personas** and evaluating their role-playing abilities through alignment with social media recommendation systems.
- Developed advanced Inductive Scoring Questionnaire (ISQ) **prompting strategies** to enhance the performance of role-playing VLMs.

Internship Experience

Tencent, Big Data Researcher, Intern (CSIG - Cloud & Smart Industries Group) — Beijing, China
Aug. to Sep. 2024

- Conducted research on geolocation optimization, utilizing **NLP** methods such as **jieba** and **ckip-transformers** to match WiFi-SSID and store names for precise geolocation.
- **Fine-tuned** the HunYuan-7b model on a constructed dataset, achieving enhanced accuracy for geolocation tasks.
- Designed and implemented a pipeline integrating the matching algorithm into **Tencent Maps**, significantly improving geolocation accuracy in industrial applications.

Tencent, Technical Researcher, Intern (CSIG - Cloud & Smart Industries Group) — Beijing, China
Jul. to Sep. 2023

- Designed and implemented **mathematical algorithms** to detect inconsistencies in apartment geological data, ensuring data accuracy.
- Optimized algorithm efficiency in **Python**, reducing time and space complexity to enhance system performance.

Skills

C++, Python, JavaScript, Matlab, HTML, SQL, PostgreSQL, AWS, Prisma, Milvus, Tableau, LaTeX, Scikit-learn, TensorFlow, Keras, PyTorch, Pandas, NumPy, Matplotlib, Linux, Visual Studio, XCode
